

Metered-Dose Medical Inhaler & Medical Cannabis Cartridge

Inhaler and Cartridge for Medical Cannabis Treatment
For Fast Reduction in Chronic Neuropathic Pain¹.

Over 90% Fewer Adverse Effects²

Compared to Other Routes of Administration³.

Approved for PTSD

Metered-Dose Inhaler

Cannabis Cartridge

Inhale. Relief. Function.

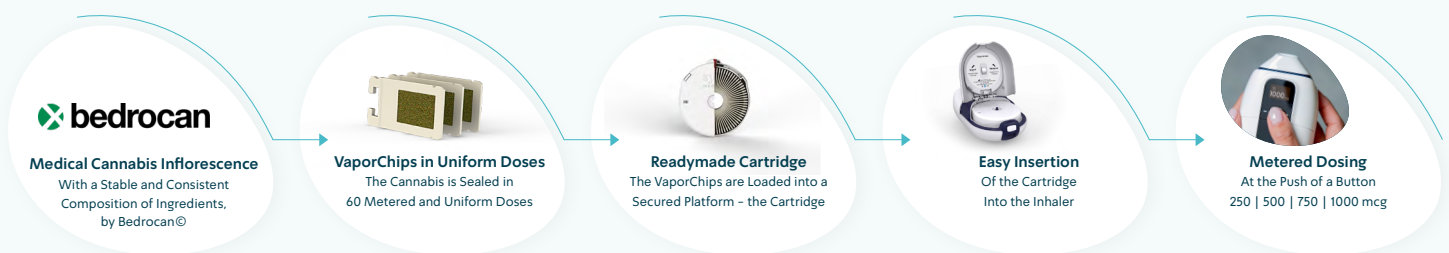

What is the SyqeAir Inhaler?

An advanced technological Inhaler for low, metered, and consistent dosing of THC, along with all the other cannabinoids and terpenes found in a full-spectrum cannabis inflorescence – at the push of a button.

What is the SyqeAir Cartridge?

An advanced technological platform that contains medical cannabis in 60 uniform doses. Each dose = one inhalation. The Cartridge contains the reproducible Bedrocan® cannabis product of the highest quality and is designed for use with the SyqeAir Inhaler only. After its easy insertion into the Inhaler, the Inhaler is ready for immediate use.

The SyqeAir Inhaler is intended for use with the SyqeAir Cartridge only. No other inflorescence or oil can be inserted into the Cartridge.

Supported by Clinical Trials:

The medical cannabis treatment using the SyqeAir Inhaler is supported by three clinical trials^{1,5,6}, two Real-World Evidence^{2,4}, and a shelf life trial⁷ published in the professional literature that proved that the medical cannabis treatment using the Inhaler is effective, safe, and stable.

-  **Improvement in sleep quality:** The sleep latency has shortened, and the sleep duration has been prolonged, on average⁴
-  **Fast onset:** Pain reduction starts within 5 minutes¹
-  **Improvement in quality of life:** 92% of patients reported an improvement in quality of life²
-  **Minimum adverse events³** compared to the other routes of administration²

About Syqe Medical

Syqe Medical Group is an innovative MedTech company that developed a breakthrough technology for administering cannabis by inhalation. We set out on our journey in 2011 with an exciting vision, outlined by Perry Davidson, Founder & CEO of Syqe Group: to reduce the pain and suffering of as many people as possible, in the fastest possible way, through advanced technologies. The company's flagship product is the SyqeAir Metered-Dose Inhaler and Cartridge for the delivery of low and metered doses of THC (in micrograms) as an indicator of all other cannabinoids and terpenes found in a full-spectrum cannabis inflorescence.

Company headquarters: Tel Aviv-Yaffo | Marketed in: Israel, Australia | Employees: Over 150
